

Dear Friends,

THANK YOU dearly for your interest in supporting Project iAm as we enthusiastically prepare for our 16th annual edition of Acoustics for Autism this March 5, 2023. We were so thankful that Mother Nature cooperated in 2022, and with the expansion of Conant Street, we celebrated the biggest and most successful Acoustics for Autism to date.

We are proud that this event has grown significantly each year – from a single, small venue in 2007 to a record breaking 17,000 person event in 2022. While staying loyal to our local roots, we are gaining national attention and notable distinction and awards right here in our community. We always want you to remember that this organization is fully vested in the community as a whole. We have continued to find unique ways to support our iAm families, especially during the last few trying years, and are happy to announce that our total scholarship distribution for ASD children in our area has reached over \$460,000 since our inception. We have forever been committed to our mission, our community, and the kids we aim to help.

Project iAm and its Acoustics for Autism event is still, and will always be 100% volunteer-based. This year, we have been able to give back to those volunteers who are going through their own struggles by hosting charity benefits on their behalf, again showing the community that we are a family and will continue to support our own. We consider you to be part of that family and hope that you will continue to support this wonderful event and our scholarship program. As you view the sponsorship material this year, please take note that due to the Uptown Maumee Construction Project, at this time we can not firmly state “where” all the outdoor street stages will be this year, but can assure you that your stage sponsorships will provide you with the same recognition you have always received.

Yours in Charity and Progress,

A handwritten signature in black ink, appearing to read "Scott", with a long, sweeping horizontal line extending to the right.
